

## Local Industrial Strategy Inquiry: Call for Evidence

### Making the Local Industrial Strategy work for manufacturing

**DEADLINE: Friday 30th August**

#### Introduction

The Local Industrial Strategies (LIS) aim to address the Places element of the five foundations of productivity set out in the Industrial Strategy (Ideas, People, Infrastructure, Business Environment and Places).<sup>1</sup>

The Strategies are led by Mayoral Combined Authorities (CAs) or Local Enterprise Partnerships (LEPs) with the objective of coordinating local economic policy and national funding streams and establishing new ways of working between national and local government, the public and private sectors.

Manufacturing accounts for 23% of the UK economy (including induced spending)<sup>2</sup> and remains a major component of the economy beyond the core cities of the UK.<sup>3</sup> It therefore must play a central role in any place-based industrial policy aimed at addressing the productivity challenge which led to the creation of the Industrial Strategy.

The Industrial Strategy was initiated by the *Building our Industrial Strategy* green paper<sup>4</sup> and launched in the *Building a Britain Fit For The Future* white paper.<sup>5</sup> In parallel, the Government released the *Strengthened Local Enterprise Partnerships* report which set a new goal for Local Enterprise Partnerships (LEPs) of ‘...a single mission: to promote productivity by delivering Local Industrial Strategies’.<sup>6</sup> This report was followed by the *Local Industrial Strategies Policy Prospectus* which called for Local Industrial Strategies to be ‘long term, based on clear evidence and aligned to the national industrial strategy’.<sup>7</sup>

The Local Industrial Strategy has the potential to play a significant role in delivering on national economic priorities, such as those highlighted in the ‘Grand Challenges’, whilst also addressing major local issues such as:

- Availability of skills
- Maximising diverse local economic strengths
- Connecting different sectors across the country
- Increasing local connectivity
- Improving regional and local infrastructure
- ‘Creating a country that works for everyone’: responding to social and regional inequalities
- Responding to the Fourth Industrial Revolution: the challenges of automation and digitisation
- Adapting to demographic changes and the ageing workforce

Effective and resilient Local Industrial Strategies will be crucial to responding to these challenges. All strategies will need to engage and support employers, work for local economies and adapt to a changing society.

## Aim of the Inquiry

This inquiry will explore how LEPs and CAs can create Local Industrial Strategies that support manufacturing and respond to local needs whilst addressing national economic priorities. It will resist the compartmentalising of policies and investigate how to build successful and resilient Local Industrial Strategies that connect the local level to the national, reflect the challenges highlighted by the Industrial Strategy and draw out issues for action.

## Instructions for Submission of Evidence

Please use the questions below to frame your response to the call for evidence, but do not feel restricted by or compelled to answer every question. The Commission welcomes all types of evidence, from data, including analysis or internal studies your organisation has carried out, to personal or organisational views on these issues. Submissions of evidence will not be published or shared with third parties. All submissions will remain anonymous unless you give the commission the right to publish your name or organisation in the report. Please provide express permission in your evidence submission below. All copies of the submitted evidence and any contact details will be destroyed within a year of finishing the project.

**The deadline for submission of evidence is Friday 30<sup>th</sup> August.** Evidence can be submitted to [ben.c.merritt@policyconnect.org.uk](mailto:ben.c.merritt@policyconnect.org.uk). For more information about the Commission or the inquiry visit <https://www.policyconnect.org.uk/apmg/manufacturing-commission> or contact Ben Carpenter Merritt, Policy Manager, Manufacturing on 0207 202 8586.

## Respondent Information

Respondent Information	
Name	
Role	
Company/Institution	

Permission	
Have you read and understood how we handle your data?	YES / NO
Do you give permission for the Commission to quote your submission?	YES / NO
Can we attribute the submission to the institution?	YES / NO
Can we attribute the submission to you personally?	YES / NO

## Research Questions

### 1. What does a good Local Industrial Strategy look like for manufacturing?

- i. *What are the barriers to creating the most successful manufacturing environment possible in relation to the foundations of productivity – Ideas, People, Infrastructure and Business Environment?*
- ii. *What would be the benefits of the Local Industrial Strategies A) developing pre-existing strengths and B) seeking to help areas diversify?*
- iii. *In what ways have you felt connected to your Local Industrial Strategies process?*
- iv. *How should the LIS process be continued to ensure they remain fit for purpose over the coming years and build on the region's successes?*

### 2. What is needed to achieve successful Local Industrial Strategies?

- i. *What do you perceive the impact of Local Industrial Strategies if they involve no immediate additional funding?*
- ii. *How can the production and delivery of Local Industrial Strategies help to drive improvements in the development of LEPs and LEP groupings?*
- iii. *How could the success of the Local Industrial Strategies be measured both for LEPs and for the Government?*

**3. To what extent are current proposed strategies sufficient to deliver national ambitions and contribute to thriving local economies?**

- i. *Please include any additional thoughts you have on this point.*
